Technical Data Sheet

Protocol K-390

Aluminum Brightener

Product # K-390

Product Information:

This hydrofluoric acid (HF) free aluminum brightener is designed with cutting edge technology that eliminates the requirement for HF. It uses a low toxicity acid salt specially designed to remove dirt, grime, and oxidation from aluminum surfaces leaving them bright and clean.

Product Information:

For standard cleaning, dilute 10:1 and apply to aluminum surface. This product takes longer than HF to act, but this allows for more control and is less prone to burning the metal. Rinse after a few minutes of contact time. To remove stains caused by overuse of HF, use this product straight followed by a rinse. DO NOT apply this product through a high temperature pressure washer like a Hotsy.

Product Specifications:

State:	Liquid
Colour:	Colourless
Scent:	Characteristic
pH:	1.0
Specific Gravity	1.09 g/mL
Cloud point:	>100°C

Packaging

Available in:	
12 x 1 L	Box
4 x 4 L	Box
20 L	Pail
205 L	Drum
1000 L	Tote
