Scale Zero

Scale and oxide remover

Product # 0208

Product Information:

CFIA APPROVED. This phosphoric acid oxide and scale remover is used to quickly remove scale and/or oxidation build-up from a variety of surfaces. It is an excellent choice for re-circulation cleaning of dish machines, removing mineral deposits from coffee makers, ice machines, and laboratory glassware as well as general removal of hard water mineral deposits. For specific use in food plants, see directions.

Directions:

The usage concentration depends on the amount of scale and the method of application. De-scaling Dishwashing Machines: Use 1L of product to 4 L of water. Circulate solution in machine until scale is dissolved (20 - 30 minutes). Drain and rinse machine thoroughly. Glass Washers: Use 60 mL of product per L of water at 50 - 60 °C. Circulate solution for 15 - 30 minutes. Scaled glasses can also be cleaned by this method, using 15 - 30 mL of product per litre of water. For other applications, start with a dilution of 20 - 30 mL of product per litre of water. Stronger solutions may be required for heavier soils. Food contact surfaces must be rinsed with potable water before reuse.

Product Specifications:

State:	Liquid
Colour:	Colourless
Scent:	Sharp
pH:	1.0
Specific Gravity	1.28 g/mL

Packaging

Available in:

12 x 1 L	Box
4 x 4 L	Box
20 L	Pail
205 L	Drum
1000 L	Tote
